

Future Matters

Best Practice Workshop: Advanced Technologies for MCP clients

Hôtel Hilton Paris La Défense, 25th October 2011

We are pleased to provide details for our Best Practice Workshops. We offer a number of these events for both OS2200 and MCP environments during the autumn. As usual further details and registration for these events can be found at www.clearpathfuturematters.com

Who should attend, and why?

With an emphasis on practical advice these workshops are designed for technical specialists. You'll hear and see how to make new ClearPath features work for you. See new demonstrations of an open source solution for Business Intelligence using JasperReports, closely integrated with MCP. Hear about the latest disk replication capabilities from EMC, and how to exploit native Security processing within the latest ClearPath systems. Need to create and process XML documents – we'll show you how.

For EAE and AB Suite developers we provide a release update, and demonstrations of version control, debugger and how social networking tools can integrate with ClearPath through Client Tools.

No death by PowerPoint! You'll see solutions in action and return to your business with ideas and information you can put to use immediately. So, we will maximise the use of demonstrations and discussions, and keep presentation material to a minimum.

Take advantage of this free consultancy opportunity – ensure all your colleagues are aware of this open invitation.

Where and When?

The workshop will be held at Hôtel Hilton Paris La Défense, 25th October starting at 09:30 and closing at 16:30. At the end of the workshop session you are free to leave, or join us for refreshments and further discussions with consultants and partners. We would like to discuss the ideas you have seen and how Unisys can help you implement these solutions in your own organisation.

09:00 Arrivals/Coffee

09:30 ClearPath MCP Workshop Commences: (coffee/comfort breaks as required)

JasperReports for MCP – Unisys completed a proof of concept using the MCP JProcessor to integrate this open source BI solution with DMSII and MySQL data sources. See how to install, administer and use JasperReports for ad-hoc BI purposes – and understand how easily new solutions can be integrated with ClearPath.

EMC Disk Replication – in addition to SRDF and MirrorView, we now have RecoverPoint, which expands the options for disk replication. We'll explain the differences and show you how to configure these capabilities to preserve your data and improve service availability.

DATABridge 6.1 – Attachmate will demonstrate the new Enterprise DB features and the brand new graphical user interface.

XML Parser for ClearPath MCP – do you want to create an Excel spreadsheet from a ClearPath application, complete with formatting and formulas? With XML Parser for ClearPath MCP you can do just that. You can also create or read any XML document. We will show you just how easy it can be.

Security and MCP Cryptography - ClearPath Next Generation systems deliver Crypto co-processing within the platform environment. Learn how to exploit the capabilities provided, and understand how recent security features for MCP - such as Secure File Transfer, SSL, Kerberos enhancements, and DMS II obfuscation – can help you.

12:30 Lunch

14:00 EAE / AB Suite Workshop commences: (coffee/comfort breaks as required)

Marketing Update – A short presentation to update you on the EAE and Agile Business suite programs, with a review of the new IC releases 1500, 1600 & 1700, and release 3.0 directions.

We will demonstrate a number of capabilities.

- Firstly, Version Control with Visual Studio 2010.
- Secondly, Debugger and ATT - test activities can represent more than 50% of development project time; these tools reduce the manual effort required, and deliver higher quality solutions by focusing on test exceptions.
- Finally we demonstrate Client Tools with Business Integrator – today we see internet transactions confirmed by tools like SMS, Twitter and Facebook; we show you how you can easily add this feature to your own applications.

16:30 Refreshments, 1:1 discussions

17:30 Departures / Close

How to register and find further information

Go to www.clearpathfuturematters.com to register. You will also find the latest agenda with speaker details and travel directions.
